AN EXELON COMPANY

[DATE]

Dear Customer:

At PECO, we are committed to providing safe and reliable energy for our customers and the communities we serve. As part of that commitment, we regularly monitor our system's performance to identify any potential improvements.

We recently inspected electrical equipment in your area to identify potential issues before an outage occurs. As a result of those proactive inspections, we will be installing equipment in your neighborhood to enhance your service reliability.

**About the Project:**

- We will install aerial equipment to protect transformers from overloading and surges.
- One pole will be replaced.
- Work will occur at the intersection of Little Lane and Glazar Road in Warminster.
- Work is scheduled for 10/12/22.
- Work will occur from 7 a.m. to 5 p.m., Monday through Friday.
- Work will be performed by a PECO crew.

Crews may need to temporarily interrupt service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned interruptions. To ensure that you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at [www.peco.com/myaccount](http://www.peco.com/myaccount) or [by calling 1-800-494-4000](tel:1-800-494-4000).

We will also work closely with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal, student transportation and emergency vehicles will be maintained during construction.

We are dedicated to keeping you informed about our work, listening to your input and modifying plans based on your feedback when possible. If you have any questions about construction, please contact Randi Martin at 215-956-3113 or [randi.martin@exeloncorp.com](mailto:randi.martin@exeloncorp.com).

Sincerely,

Chantee Angus  
Director, Regional Electric Operations, PECO
