Tim,

Thanks, if possible we would like to see the setup of the Navy's facility (I think it may be a little more like what we were looking as a 1st design). If you could let us know when Jeff has a little time to show us the facility we can try to coordinate a time that works for all. Thanks for all your help with the PFOS issues.

Here are the foreseeable projections we have for connections that will flow to WMA Log College Treatment Plant (with DEP Planning status [if any]):

Fred,

The carbon change out was already completed. If I get notice of change out again I will forward to you or those attempting to replace you. If you or some of your staff want to view the Navy's facility, I can set it up with Jeff Dale.
